SUMMARY

Computer Science student with paid graphic design experience and Codex-assisted Python application projects. Seeking entry-level AI software and backend roles, with portfolio evidence in retrieval evaluation, API design and usable interfaces.

PERSONAL PROJECTS

Personal projects developed with Codex assistance.

EvidenceDesk | Evidence-grounded support knowledge workbench

- Python/FastAPI service with real local MiniLM embeddings, BM25/hybrid retrieval, source excerpts, citations and explicit weak-evidence refusal.
- Extractive responses with document revisions, stale-write conflicts, deletion and immutable citation snapshots in SQLite.
- On a 26-case synthetic holdout, hybrid found the expected source for 14/18 answerable queries versus 11/18 for BM25; refused 8/8 unsupported or adversarial queries.

FlowLedger | Auditable workflow automation service

- Python/FastAPI workflow service with typed routing, SQLite durable outbox, approvals, retries, dead-letter replay and lease-token fencing.
- Passed 9/9 local SQLite experiments: 12 repeated submissions produced one job; eight workers completed 16 jobs with zero duplicate local cases; real worker crash recovery retained one case.

PROJECT TECHNOLOGIES

Application stack: Python, FastAPI, Pydantic, SQLite, SQL, HTML, CSS, JavaScript

Retrieval and quality: MiniLM, FastEmbed, ONNX Runtime, BM25, hybrid retrieval, evaluation fixtures, pytest

Tools and collaboration: Git, GitHub, Codex, technical documentation, interface review and design iteration

EXPERIENCE

Graphic Designer | Wecanstore.com

Jun 2022 - Jul 2023 | Bongaigaon, Assam, India | Full-time

- Created digital banners, social media graphics and marketing materials aligned with brand guidelines.
- Collaborated with marketing and sales teams and incorporated feedback across design projects.
